Apex Developer Experience:
Start Fast, Build With Confidence

Explore. Test. Innovate. Launch.

Use Apex as your launchpad into the tech-forward global investment ecosystem with cloud-native, real-time solutions supported by a modern developer experience.

Give your engineers the option to use our Developer Portal or our Apex AI Suite. Either path equips you with APIs, SDKs, documentation, and more to create digital investor experiences that can help attract and retain next-gen investors — just choose the option your team prefers:

▷ **Apex Developer Portal:** Request early access to build proofs-of-concept and evaluate the AscendOS capabilities

▷ **Apex AI Suite:** Accelerate development cycles with Ask Ascend, our AI assistant, and the Agentic Development Kit (ADK), for use with third-party agentic AI tools

KEY BENEFITS

✓

Use agentic AI or our sandbox
Opt to use agentic AI plus our ADK or the sandbox plus Developer Portal tools

✓

Accelerate time to market
Reduce development cycles with agentic AI or quick-start guides, SDKs, and more

✓

Evaluate our tech before you buy
Use natural language with an agentic AI tool or code in the sandbox to validate that AscendOS can power your critical business workflows

✓

Increase confidence in deployment
Build production-ready proofs-of-concept

✓

Get AI-powered answers 24/7
With agentic AI or our AI assistant, Ask Ascend˚, get detailed answers any time you're working (even if we aren't)

✓

Receive human help too
Lean on our client onboarding and solution engineering teams for guidance along the way

APEX
Fintech Solutions™

```java
import com.apexfintechsolutions.ascendsdk.SDK;
import com.apexfintechsolutions.ascendsdk.models.components.*;

SDK sdk = SDK.builder()
    .serverURL(System.getenv("APEX_APIS_URL"))
    .security(Security.builder()
        .apiKey(System.getenv("APEX_API_KEY"))
        .build())
    .build();

AchDepositCreate depositRequest = AchDepositCreate.builder()
    .bankRelationshipName("bank-rel-123")
    .amount(1000.00)
    .build();

sdk.achTransfers().createAchDeposit()
    .accountId("acc-456")
    .achDepositCreate(depositRequest)
    .call();
```

KEY FEATURES

ADK for Use With Agentic AI

▷ **Complete ecosystem knowledge:**
Get context-aware access to the entire
AscendOS platform, including APIs,
SDKs, and proprietary workflows

▷ **Natural language interaction:**
Empower both technical and non-technical
users to evaluate the platform and ask
complex questions all in your Integrated
Development Environment (IDE)

▷ **Expert-level, multi-step code generation:**
Generate production-ready, context-aware
code that autonomously follows AscendOS
best practices and includes error handling

Apex Developer Portal

▷ **Pre-sales sandbox:** Build proofs-of-
concept in a secure environment that
mirrors production

▷ **Developer tools built by developers:**
Count on robust API documentation,
multi-language SDKs, recipes, and more

▷ **Real-time developer dashboard:** Monitor
progress, track errors, and gain visibility into
your integration workflows

▷ **Production-mirrored UAT environment:**
Seamlessly move from the sandbox to
a UAT environment that is a 1:1 match
for production

I'm just blown away with what
we built with the Apex Agentic
Development Kit. We're just
scratching the surface.
